

Hot Air Balloon Craft For Kids

Materials Needed:

- Printable PDF Template
- 5 colored pieces of paper
- Cardboard toilet roll or paper cupcake liner
- Scissors
- Glue/tape
- Twine/string

Start by cutting out 5 hot air balloon shapes with different colored papers. Try to make them as close to the same sizes as possible! Fold them in half and glue each side to another paper to make it 3D.

Cut a little piece of a cardboard toilet paper roll off and tape some twine inside it. Tape the top of the pieces of string to the inside of two balloons. You can use a paper cupcake liner instead of the cardboard toilet roll for the basket of the hot air balloon.

That's it! A picture of a completed hot air balloon is below.
