Training:	Advanced Searching, Circulation, Keyboard Shortcuts, Linking	

Enterprise Upgrade Scheduled

As was previously announced to the sasusers and the enterprise email distribution lists, SirsiDynix will be upgrading our Enterprise Catalog to the latest version on 10/29/2015 at 2:00am. The Enterprise Catalog will be unavailable until approximately 8:00am on 10/29/2015 for the upgrade. A message to the effect has been posted in the Enterprise catalog.

One of the enhancements in this new version of Enterprise that is of greatest interest to users of the shared system is that publication date will be taken into account in the relevance ranking of search results.

Hartland Migration – Update

Work on the Hartland Cromaine library migration to the shared system continues on schedule. A test load of all of Hartland's data was loaded onto our test server earlier this month and is under active review by Hartland and TLN staff. Circulation, Linking, and Acquisitions training for Hartland staff is underway. We are on schedule for Hartland's go-live date of November 19.

COSUGI Consortia Special Interest Group Meeting

Anne Neville will be attending the Customers of SirsiDynix Users' Group (COSUGI) Consortia SIG (Special Interest Group) meeting on October 22-23, 2015 in Boston. This annual two day meeting allows the Consortia special interest group to meet and discuss issues and problems relevant to consortia. SirsiDynix staff will attend the second day of the meeting in order to discuss with the group those issues and challenges and suggest possible solutions.

Thanksgiving Holiday – Reminder

TLN and the Shared Technology Services department will be closed on Thursday, November 26 for the Thanksgiving holiday. Shared system staff will use the holiday hours to perform system maintenance activities. Enterprise will be available during this time as much as the maintenance work permits.

The shared automation system will be available on the Friday after Thanksgiving, November 27, 2015 for those libraries that are open; however, the helpdesk will not be staffed. Non-emergency helpdesk tickets may be opened as usual; should an emergency occur, call the regular helpdesk phone number (248-536-3100 x134) and an emergency phone number will be provided.
